

From Polish to Gel UP14 LED/UV Curing High Gloss Gel Topcoat

- **UP14 LED/UV Curing High Gloss Gel Topcoat** creates a luxurious high shine gel effect when applied over any regular surface dry nail varnish.
- Absolutly no damage to the natural nail.
- Specially formulated, this Soak-Off top coat achieves a perfectly smooth, high shine finish on regular nail varnish, which actually enhances the colour of your manicure.
- Apply the nail varnish and leave to surface dry for approx. 15-20 minutes before applying UP14 UV/LED Curing High Gloss Soak-Off Topcoat. Once cured for two minutes with either a LED or UV lamp, the manicure instantly becomes diamond hard which dramatically extends the longevity of any regular nail varnish.
- Drying time is significantly reduced, nails are completely dry afer removing any sticky residues with Finishing wipe*, meaning that no scuffs or marks will be left on the varnish.
- Easily removed with acetone based remover, this topcoat is an essential addition to any manicure regime.
- **The product is legally certified and retail ready.**
- The product has been independently tested by a representative panel, with a variety of different nail types.

* Finishing wipe used should not contain moisturisers, as this will affect product performance
